This report, published each calendar quarter, is a compilation of employment and wage data. The information is compiled from reports submitted to the Montana Department of Labor and Industry by employers subject to the Montana unemployment insurance law. Also included in the report are similar data for federal government employees in Montana.

Employment and wages are totalled according to county, private ownership, government, and industry.

A special thank you to:

- Kate Kahle, Research Specialist, who analyzed the data and wrote the text
- Sheila Hill, who assisted in the analysis and preparation of data and maintains the program libraries
- Nicolle Will, Statistical Technician, who input text, created graphs, arranged, and distributed the publication.

If you have any questions, please contact Kate Kahle at (406) 444-3294.

Quarterly Summary of Employment and Total Earnings by County and Industry 1

Quarterly Statewide Summary of Employment and Total Earnings by Industry 30

DEFINITIONS

COVERED EMPLOYER

Employers other than agricultural or domestic:

To be a covered employer, an employer must meet one or more of the following criteria:

- have an annual payroll which exceeds $1,000 in a calendar year
- acquire all or a substantial portion of a covered business, or
- be subject to FUTA

Agricultural and domestic employers:

If the employer is an agricultural entity, the employer must pay total cash wages of $20,000 or more in a calendar quarter or employ 10 or more workers in 20 different weeks in a calendar year to be covered.

A domestic employer who pays total cash wages of $1,000 or more in a calendar quarter is a covered employer.

In addition, if the agricultural or domestic employer has another business which is covered, the employer must also report its agricultural or domestic employees, regardless of the amount of wages paid or number of employees.

COVERED EMPLOYMENT

Covered employment includes all services performed for wages or under contract, unless specifically excluded by law.

Some common exclusions from covered employment are:

- individuals in employment of son, daughter, or spouse.
- children under 21 employed by parent (or partnership of parents)
- real estate or insurance salespeople paid solely by commission and without guaranteed earnings
- full-time students working in a program taken for credit
- inmates working for a state correction or custodial institution
- elected public officials
- railroad employees
- church employees
- children under 18 delivering and distributing newspapers or shopping news from house to house and business establishments
- physically or mentally impaired individuals working in a rehabilitation facility

STANDARD INDUSTRIAL CLASSIFICATION (SIC CODE)

Each business is assigned a SIC code that describes the business based upon its nature-of-business in accordance with the Standard Industrial Classification Manual, 1987 edition.

ESTABLISHMENT

Employment for a given month is the number of workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES

Gross wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the quarter.

DISCLOSURE RESTRICTIONS

Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

AVERAGE WEEKLY WAGE (AWW)

Average weekly wage (AWW) is derived from the total wages of all reported employees of any industry or major group, the average monthly employment for that industry or group during the week of the 12th of each month and the number of weeks in the quarter.

AWW is affected by large bonuses, overtime, pay premiums, part-time employment, commissions, etc. These may drastically raise or lower the statewide or county level figure.

AWW is given as a statistical figure which can be used with current employment data to evaluate and better understand the economic position of an industry or major group.

It is not the size of the average employee's paycheck.

SECOND QUARTER, 1990, IN REVIEW

QUARTERLY:

Employment in Construction was up 32.7% from first quarter 1990 figures, a regular seasonal increase. Special Trade (SIC 17) showed the highest increase, with 1,087 additional covered employees over first quarter 1990. Heavy Construction (SIC 16) added 992 additional employees, a 54% increase. General Building (SIC 15) increased 484 employees.

Second quarter 1990 average wages were higher in all major groups when compared with first quarter 1990 wages. Heavy Construction (SIC 16) wages of $547 per week were an average $86 per week higher than first quarter. General Building (SIC 15) showed wages $24 per week higher than the previous quarter.

ANNUAL:

Second quarter 1990 average employment of 10,405 in Construction was 4.6% higher than second quarter 1989. Special Trade (SIC 17) employment was up 530 covered workers, an average 12.3% higher than the same quarter one year ago. Heavy Construction (SIC 16) average employment, with 176 fewer covered workers reported, was 5.9% lower than 1989 second quarter.

Average wage comparisons showed total Construction industry wages 5.1% higher in second quarter 1990 than second quarter 1989. Heavy Construction (SIC 16) average wages of $547 per week were 12.6% higher than second quarter 1989 wages. This was primarily due to milder weather during second quarter 1990 than second quarter 1989. Average wages in General Building (SIC 15) and Special Trade (SIC 17) were 2.6% and 2.7% higher respectively than in the same period the previous year.
